

Lazure Glaze

Description

A water-based, non-toxic, fast-drying medium for creating paint effects. Beautifully scented, BioPaints Lazure Glaze can be used in various ways by layering translucent coats of colour. The paint-effect surface can be sealed with a pure or slightly diluted coat of clear glaze to increase washability and grease and water resistance.

Uses

To create paint effects, such as rag rolling, stippling, veil painting, marbling, stencilling by mixing a clear glaze with pigments for coating surfaces pre-painted with BioPaints Wall Paint

- Gib board, wallpaper, plastered walls and timber panelling
- Can also be used as an artist's medium

Colours

Lazure Pigments - available in 250mls		Powder Pigments - available in 75g	
3210	Red	1301	Ebony Black
3220	Bordeaux Red	1302	Red Iron Oxide
3230	Yellow	1303	Umber
3240	Golden Ochre	1304	Ochre Red
3255	Green	1305	Ochre Rust Brown
3260	Ultramarine Blue	1306	Yellow Orange
3275	Blue	1307	Ochre Yellow
3280	Umber	1309	Red
3290	Black	1310	Ultramarine Blue
		1311	Sun Yellow
		1312	Ultramarine Violet
		1313	Ultramarine Red
		1314	Violet
		1315	Spinell Green
		1316	Spinell Turquoise
		1317	Spinell Blue

Coverage

- 15-20m² per litre, depending on absorbency of the substrate, for the dilution recommended in 'Applying the Product – Tinting and Mixing Instructions'.

Container Sizes

- 1 Litre, 2 Litre, 5 Litre for Glaze (see 'Colours' for pigment sizes)

Ingredients

Water, shellac, larch bitumen, castor oil, linseed oil, colophony resin ester, polysaccharide, sodium poly-phosphate, turkey red oil, aliphatic hydrocarbon, borax, citral, lavender oil, thyme oil.

Preparing the Surface

1. Prepare the surface in accordance with standard practice to AS/NZS 2311:2000
2. Apply to surfaces that have been pre-coated with the appropriate number of coats of BioPaints Wall Paint Primer and BioPaints Wall Paint – see relevant Data Sheet.
3. Ensure the surface is smooth, dry and clean.

Note: Tinted products are non-refundable.

Applying the Product

1. Do not use below 5°C.
2. Ventilate well when working with the product and while it is drying.

3. Make trials first to find the colour and application method to achieve your desired finished look.
4. Make up the glaze solution to the desired colour (see instructions below).
5. The mixture can be applied by brush, roller, sponge or rag.
6. Subsequent coats can be different colours or strengths of colour.

Tinting and Mixing Instructions

BioPaints Lazure Pigment range: Mix BioPaints Lazure Pigments into BioPaints Lazure Glaze and water to reach the desired strength of colour. A suggested recipe is: 2 parts BioPaints Lazure Glaze, 1 part BioPaints Lazure Pigment, 7 parts water. For the best mixing results add pigment to the glaze; then add water gradually in small amounts while stirring continuously.

BioPaints Powder Pigment range: The range of colours in the BioPaints Lazure Glaze paint system can be enlarged dramatically by using the BioPaints Powder Pigments. In order for the powder to be smoother and to enable it to be fully dissolved by the glaze, mix 75g pigment into 100g water and leave to stand for at least 12 hours (stir periodically). Stir BioPaints Lazure Glaze into the pigment paste - a suggested recipe is: 200-300g of BioPaints Lazure Glaze into 10g of pigment mixture and gradually thin with 600-700g of water. It is essential to combine slowly, working in well and to get it evenly combined.

For a more durable finish the quantity of BioPaints Lazure Glaze can be increased. A final coat of 1 part Lazure Glaze: 1-2 parts water can be applied over the finished paint effect.

Always test for adhesion and compatibility on your substrate, particularly on already painted or questionable surfaces.

Drying

- Allow a minimum of 3 hours between coats. Apply no more than 3 coats per day.
- 3 coats or less will be fully dry within 24 hours.

Cleaning

- Clean implements immediately after use with water or BioPaints Heavy Duty Cleaner if necessary. Wash in sinks that flow to sewers, not storm water drains.

Maintenance

- Clean only after fully hardened allow 14-21 days. Use a damp cloth with a gentle non-abrasive cleaner for surfaces coated with BioPaints Lazure Glaze. We recommend BioPaints Household Cleaner.

Safety Precautions

Natural ingredients can still be harmful to users and the environment if misused, or if accidents occur, so please carefully observe the following:

- Keep out of reach of children.

Storage

- Keep tightly sealed in a cool, dry, frost free place.
- Use opened containers as quickly as possible.

Disposal

- Do not dispose of in drains and wastepipes.
- Let waste dry out and recycle empty containers where possible. Dispose of according to council regulations.
